

**HYDRECO HYDRAULICS ITALY, A DAIKIN GROUP COMPANY:
INNOVATION AND RELIABILITY AT EIMA 2024**

Hydreco Hydraulics, a global leader in the design and production of hydraulic components for mobile machinery, is preparing to participate in EIMA International 2024, to be held in Bologna from November 6 to 10. The company will showcase key innovations designed to enhance performance and productivity in the agricultural and industrial sectors.

Vignola (Modena, Italy), October 7th, 2024 – At Hall 18, Stand C33, visitors will have the opportunity to discover Hydreco's flagship products up, including the new MHDC joystick, MS directional valves, HY series gear pumps and motors, and Power Take-Off (PTO), all developed through close collaboration between Hydreco and the Duplomatic Group. These innovations confirm Hydreco's commitment to providing advanced, reliable, and customizable motion control solutions to meet the needs of the agricultural machinery market.

Innovation and Precision with the MHDC Joystick

The MHDC joystick is the perfect combination of precision and compactness. Designed for use on operating machinery, it ensures flawless control even in tight spaces, making it ideal for precision agriculture.

MS Series Directional Valves

The MS valves offer customizable modular solutions, designed to improve control and operational efficiency on agricultural and industrial machinery. This product guarantees flexibility and performance even in challenging operating conditions, addressing the sector's toughest demands.

HY Series: Robust and Versatile Pumps and Motors

The HY series of gear pumps and motors is designed for efficiency and long-lasting durability, with options available in both aluminium and cast iron. Ideal for a wide range of applications, the modular configurations allow for tailored customization to meet diverse production needs.

Power and Versatility with the New PTOs

Hydreco's PTO (Power Take-Off) line guarantees performance and reliability across a wide range of applications, from agricultural equipment to commercial vehicles, reducing downtime and improving overall efficiency.

At the stand, other motion control products will also be on display, such as hydraulic joysticks and pedals, power units, machine control systems based on #CANbus protocol, bankable valves, and hydraulic cylinders, completing the full package for our customers.

A Team at Your Service

Visitors will have the opportunity to meet our technical sales team at the stand for personalized consultations and in-depth technical insights.

Special Press Event: *On November 6, during the opening day, a press event will be held from 2:30 PM to 3:15 PM at the Hydreco stand, where the new solutions will be presented.*

Hydreco Hydraulics Italy, with its premises in Vignola (MO) and Parma, is the Italian branch of the British group Hydreco Hydraulics headquartered in Poole, UK, which was acquired in 2019 by Diplomatic MS of Parabiago (MI) – now part of Daikin. As of 31/12/2023, the group has a turnover of €170 million and employs over 700 people. Hydreco Hydraulics has a long and significant tradition in hydraulic components: for over a hundred years, it has been designing, producing, and distributing products for the transport and mobile hydraulics sectors. With locations in Italy, Norway, Germany, the USA, India, and Australia, Hydreco operates a global network of production and sales.
